

# Knightsbridge Asset Management, LLC

660 Newport Center Drive – Suite 460 – Newport Beach, California 92660

(949) 644-4444 – Website: [www.knightsb.com](http://www.knightsb.com)

Extensive research of ‘investment anomalies’ is the driver of the Knightsbridge investment process. Knightsbridge believes that misunderstood opportunities may lead to superior risk-adjusted returns. The firm avoids popular or market-based convention and seeks to capitalize on market inefficiencies and irrational behavior. In seeking ‘absolute return’, portfolios are invested across market capitalization without regard to index characteristics. Absent compelling reasons to be fully invested, cash may be used as a defensive tool.

Scanning for ‘investment anomalies’ such as spin-offs, dividend eliminations, emergence from bankruptcy, insider buying, etc, the investment team develops a universe of investment candidates. Investment anomalies may be characterized by factors such as investor overreaction, forced turnover of the shareholder base, structural occurrence and/or a lack of available information. Screening this universe, the investment team identifies stocks with a high probability of superior returns.

Focusing on best ideas, the team invests across market capitalization wherever investment anomalies and perceived undervaluation are found. Portfolios are concentrated among 15-25 stocks with sector representation the residual of stock selection. Historical portfolio turnover has averaged less than 40%.

## Recent Purchases

Citigroup (C) was purchased in January amidst weakness in the bank group and the U.S. stock market as a whole, leading to weakness in the company’s share price, as well. We believe that several dynamics at the time of our purchase support a case for earnings recovery, eventual multiple expansion and significant advances in the stock price. We don’t believe anticipated improvement was fully reflected in the stock price at the time of our purchase, given investor fear regarding regulatory headlines and concerns about overhang of the U.S. government’s ownership stake in Citigroup.

Madison Square Garden (MSG) was purchased in February after the company was spun out of Cablevision Systems Corporation, amidst heavy selling pressure and a broader market correction. We believe the large, uncertain amount of capital expenditures related to the planned renovation of Madison Square Garden produced investor uncertainty and disinterest in the stock, leading to depressed valuations. We also believe the company’s premier assets in the attractive New York City market should position the company well as the economic environment in New York City improves from depressed levels over our holding period, leading to higher profits and multiple expansion.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

\* "Pure" gross-of-fees returns do not reflect the deduction of any expenses, including trading costs and are supplemental to net returns.

*Opportunistic Value Equity WRAP Composite* contains fully discretionary equity accounts and for comparison purposes is measured against the S&P 500 Total Return Index and Russell 3000 Value Index. The S&P 500 Total Return Index is a free-float market-capitalization weighted index of 500 of the largest companies in leading industries of the U.S. economy. The Russell 3000 Value Index measures the performance of the broad value segment of the U.S. equity universe and includes those Russell 3000 companies with lower price-to-book ratios and lower forecasted growth values. The indices are calculated on a total return basis with dividends reinvested. Indices are not available for direct investment. The Opportunistic Value Equity WRAP Composite differs from the indices in that the composite represents portfolios with an average lower market capitalization, narrower diversification in terms of number of securities, more focused sector representation, and that may not always be fully invested as compared to the indices.

Knightsbridge Asset Management, LLC has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®).

Knightsbridge Asset Management, LLC is an independent registered investment adviser. The firm maintains a complete list and description of composites, which is available upon request.

Knightsbridge Asset Management, LLC's Opportunistic Value strategy is an all market capitalization value strategy, generally invested in 15-25 equity holdings, with manager discretion to hold significant cash in lieu of equities from time to time. Portfolio concentration has become more diversified over the years while maintaining the same investment strategy. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends and interest income. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of fees and include the reinvestment of all income. Gross returns are shown as supplemental information and are stated gross of all fees and transaction costs; net returns are reduced by all fees and transaction costs incurred. All-inclusive/Bundled/Wrap fee accounts pay a fee based on a percentage of assets under management. Other than brokerage commissions this fee includes investment management, portfolio monitoring, consulting services, and in some cases, custodial services. Wrap/Bundled fee accounts make up 100% of the composite for all periods shown. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor. Per client direction only, margin balance has/may be utilized, but is not part of the investment strategy. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Additional information regarding the policies for calculating and reporting returns is available upon request.

The investment management fee schedule for the wrap programs vary between 2.0% and 3.0%. Actual investment advisory fees incurred by clients may vary.

The Opportunistic Value Equity WRAP Composite was created July 1998. Knightsbridge Asset Management LLC's compliance with the GIPS standards has been verified for the period July 1998 through December 2009 by Ashland Partners & Company LLP. Performance presented prior to July 1998 occurred while the portfolio management team operated as a division of Canterbury Capital Services, Inc and were the only individuals responsible for selecting the securities bought and sold. While at Canterbury Capital Services, Inc, this composite was not maintained. Composite performance prior to July 1998 is calculated from all portfolios representative of the investment strategy. A copy of the verification report is available upon request.
